

Workspot Windows 10 Install

- Please note you will need to determine the version of Windows 10 you have, either 32-bit or 64-bit prior to downloading the Workspot client.
- Browse to <http://www.crmchealth.org/about-crmc/workspot>. Click the **Downloads** tab.
- Download either the 32-bit or 64-bit version of the Workspot client.
- Once the client is downloaded, double click on the .MSI file.
- When the install is complete, you will find the Workspot shortcut on the Desktop as well as the Start | Programs menu.
- Open the Workspot client. Login with your network credentials.
- A window will open and your applications will be listed. If you need additional applications that are not listed, please contact us at 931-783-2637.
